Trans. of mono. Gidravlika Gaso-Zhidkostnykh Sistem, Moscow, 1958, 232p.

A systematic description is given of the most essential laws governing the combined motion of a gas and a liquid. The problems considered are: the motion of a gas-liquid mixture in pipes, bubbling, atomization of a liquid by mechanical and pneumatic spray nozzles, critical regimes of boiling, and several other problems. The book is designed for scientific workers, engineers, and students specializing in the fields of physical-heat engineering, power engineering, hydromechanics, chemical processes, and equipment.
